

## iPad Wireless Configuration

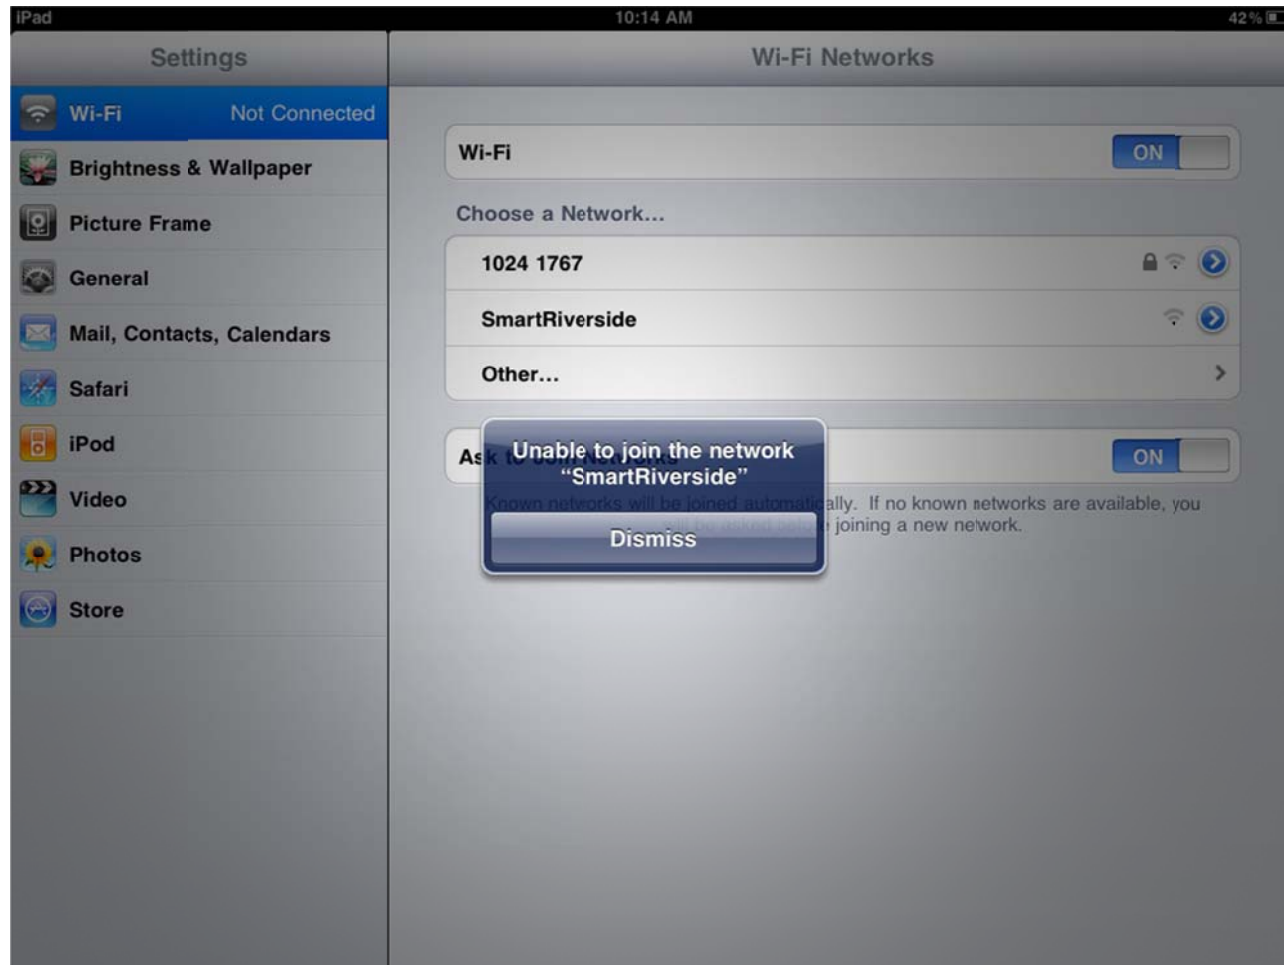

1: From the home screen go to> Settings

2: From settings, go to **Wi-Fi**. Under **Choose a Network**, select **SmartRiverside** (please note, the distance between the iPad and the access point cannot exceed 250 ft.).

3: If the following error message appears, the signal strength is too weak. Proper connection will require less distance between the iPad and the access point.

4: If connection is properly established, this page will appear in the internet browser. Enter e-mail address and click **I Agree**.

You are now ready to begin browsing.
